How to calculate pricing:

Determine the number of shirts you will order to find your base price (remember, base pricing includes a one- or two-sided print up to 225 square inches). If you need any additional features such as a sleeve print, add the fee shown in that column to the base price. For example:

- One royal blue tee, with a sleeve print in size 2XL would be \$19.00. (\$15.00 base price plus 2xl fee of \$2.00, plus \$2.00 for sleeve print).
- 30 white tees, with a 5" x 5" front print and a 15" x 15" back print would be \$16.00 each (because total printed area is larger than 225 square inches).

*To determine square inches:

Multiply the height times the width of your graphic. The resulting figure is the square inch measurement of your graphic. If you have a graphic on the front and the back of your shirt, do not forget to add the two totals together!

Long Sleeve T-Shirts

Pricing includes one- or two-sided prints (total print area of both sides combined must not exceed 225 sq. inches*) on white, grey, or black fabric.
